

Rohith M, Full Stack Developer (MERN + GenAI)

Erode-638453 Mobile: +916381800016 [LinkedIn](#) [Portfolio](#) [Github](#) Mail: rohithm1482@gmail.com

PROFESSIONAL SUMMARY

Full-stack engineer with 2+ years of experience building MERN applications, REST APIs, and autonomous GenAI workflows with React, TypeScript, Node.js, and Gemini AI. Built internal platforms cutting manual evaluation time by ~95% and engineered a production-adopted query assessment platform.

SKILLS

Languages & Frontend: JavaScript, TypeScript, React.js, Redux Toolkit, React Query, HTML5, CSS3, Tailwind CSS

Backend & Systems: Node.js, Express.js, REST APIs, Microservices, Socket.io, Puppeteer, Redis, Docker, and NGINX.

GenAI & Databases: Gemini AI API, RAG Workflows, MongoDB, MySQL, Mongoose.

Cloud & Tools: AWS SES, S3/EC2 (Basic), Cloudinary, Git, GitHub, Postman, JWT, RBAC, OAuth 2.0

EXPERIENCE

HCL GUVI, Chennai.

Associate Full Stack Developer,

Jan 2024 – Present

(Career Progression: Tech Support Intern → Associate Full Stack Developer L&D)

- Engineered an **AI-powered resume and portfolio evaluation platform** using Node.js, Puppeteer, Gemini AI, MongoDB, and AWS SES, reducing manual evaluation effort by ~95% through automated analysis, scoring, feedback generation, and email delivery.
- Developed the **SQLKATA MERN prototype**, implementing real-time SQL execution, automated test validation, and admin workflows; the POC was subsequently **adopted by the development team as the foundation for the production product**.
- Developed an internal **invoice management platform** using React, Node.js, Express, MongoDB, JWT, RBAC, and TanStack Query, integrating internal APIs for automated session synchronization, approval workflows, audit tracking, and manual worklog management.
- Engineered an **AI-based project evaluation platform** that analyzes GitHub repositories against PRD requirements using Gemini AI and custom evaluation rubrics, generating structured scores, identifying security and architectural issues, and suggesting code-level fixes.
- Performed **1,000+ technical reviews and root-cause analyses** across MERN applications, resolving application, API, database, authentication, and deployment issues for learners and internal stakeholders.

PROJECT

SQLKATA POC (Internal) : Built a proof-of-concept MERN-based SQL assessment platform with real-time query execution, automated test validation, and admin dashboard. POC was adopted by the dev team as the foundation for the production product, accelerating the final development. **Tech:** [React.js](#), [Node.js](#), [Express.js](#), [MongoDB](#), [REST APIs](#)

AI Portfolio/Resume Evaluator (Internal) : Automated the learner evaluation process by building an AI-powered platform that analyzes resumes and portfolio websites, generates scores and structured feedback, and delivers results via email, reducing manual review effort by 95%. **Tech:** [React.js](#), [Node.js](#), [MongoDB](#), [Gemini AI](#), [Cloudinary](#), [AWS SES](#), [Puppeteer](#)

Invoice Management Platform (Internal) - Developing an invoice management platform for mentor billing using the MERN stack. Implementing GUVI API integration for automated technical session synchronization, role-based approval workflows, audit tracking, and manual worklog management to ensure accurate hourly billing. **Tech:** [React.js](#), [Node.js](#), [Express.js](#), [MongoDB](#), [JWT](#), [RBAC](#), [GUVI API](#), [TanStack Query](#), [Redis](#), and [BullMQ](#).

EDUCATION

MCA, Kongu Engineering College, 2022-2024,

CGPA 8.4
